Everything below is either part of the offering circular filed with the SEC or a summary of it. Request any item on the daily live walkthrough or through Investor Relations at TheOakCompanies.com; we aim to respond within one business day. Where a page number is shown, you can also go straight to the offering circular yourself — it controls over every summary, including this one.

This index lists documents and summaries available in connection with the Series R offering. It is not an offer to sell or a solicitation of an offer to buy any security; an offering is made only by means of the offering circular. This index must be delivered together with the offering circular prior to making any investment. Investing in Series R Preferred Stock is speculative and involves a high degree of risk, including loss of your entire investment. Dividends are payable only when authorized out of legally available funds. The dividend is contingent on Oak's ability to pay the dividend or issue shares in the case of a conversion. Dividend accrual begins on the date of Oak's acceptance of the investor's subscription. A Listing Event may never occur. No assurance can be given that Oak's application to list on NYSE American will be made and, if made, that it will be approved, or that an active trading market for the Common Shares will develop. Past performance is not indicative of future results. Materials relating to other Oak offerings or funds are not part of this offering and are not available to Series R prospects. Page references are to the printed page numbers of the Preliminary Offering Circular dated September 2, 2026 and will be conformed to the final offering circular.
